

Enclosed Laboratory Filtration System BECO INTEGRA® LAB 140 P

Versatile, Sanitary Design Laboratory Depth Filtration System

BECO INTEGRA LAB 140 P is an enclosed single-sheet depth filtration system with a wide range of accessories for small volume filtration tasks in laboratories and research centers. The areas of application include small batches and upscaling in biotechnology and pharmaceutical, chemical, and cosmetics industries.

Special Features

- **Simple and clearly arranged design** with many connection, valve, and pressure measurement options.
- An O-ring sealing ensures a **high level of safety** by preventing leakage to the surrounding atmosphere.
- Ergonomic design for **easy handling**. Effortless replacement of BECO® depth filter sheets; thorough and **easy cleaning**, no dead spaces.
- **Variable application possibilities** by using the base filter and sludge chambers of various size (with and without heating) for sheet and cake filtration.
- System components enable **parallel or step filtration** processes using one arrangement of several filters.

Other models and enhancements with additional components for complete systems are possible according to requirements.
